

SREEKAR BOORLE

Software Engineer | Backend & API Developer

bsreekar30@gmail.com | +91-8519975949 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer with professional experience building automation solutions, scalable REST APIs, and backend systems using Python, FastAPI, PostgreSQL, and MySQL. Skilled in API integration, database optimization, authentication systems, and clean architecture. Proven ability to improve application performance, automate workflows, and deliver maintainable software solutions across professional and independent projects.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, Java, C
- **Core Python:** Object-Oriented Programming (OOP), AsyncIO, Scripting, Algorithms, Exception Handling, File Handling
- **Backend:** FastAPI, Flask, REST APIs, JWT Authentication, SQLAlchemy(ORM), API Integration, WebSockets
- **Web Technologies:** HTML5, CSS3, Responsive Web Design
- **Databases:** PostgreSQL, MySQL, Redis
- **Tools & Platforms:** Git/GitHub, Docker, Postman, Render, Vercel
- **Concepts:** OOP, Data Structures & Algorithms, Agile, Clean Architecture, Software Documentation, Testing

PROFESSIONAL EXPERIENCE

Software Developer | Technodyne Informatics Pvt. Ltd.

2025 – Present

- Built a Python automation pipeline for client asset processing, eliminating repetitive manual tasks and improving workflow efficiency. Collaborated with cross-functional teams to translate business requirements into technical solutions and documented component architecture to improve maintainability and knowledge sharing.
- Developed reusable JavaScript components using Object-Oriented Programming (OOP) principles to build responsive, mobile-first user interfaces across multiple client projects, improving code reusability and consistency.
- Diagnosed and resolved application and deployment performance bottlenecks through debugging and code optimization, improving application stability and deployment efficiency.

PROJECTS

Geo-Fenced Attendance & Access Control System — *Python, FastAPI, MySQL, REST APIs*

- Designed a FastAPI backend with OOP-structured authentication modules and GPS radius-validation logic that cut unauthorized attendance access by 40%.
- Optimized MySQL schema and query design to achieve 30% faster data retrieval; documented full API architecture and maintained version control via Git across the project lifecycle.

Scalable Expense Tracking API Platform — *Python, FastAPI, MySQL, REST APIs*

- Engineered a FastAPI backend with full CRUD, filtering, sorting, and pagination, applying clean OOP architecture to cut server-side processing overhead by 25%.
- Built validation and exception-handling layers with dedicated test coverage, running self-review against coding standards before every release to maintain reliability.

NLP-Powered Intelligent Chatbot — *Python, Flask, NLP, REST APIs*

- Built a modular NLP chatbot in Flask using OOP design patterns, exposing REST APIs with documented contracts to connect frontend and backend cleanly for future extension.

Shoe E-Commerce Platform — *React, Node.js, Express.js, MongoDB, Stripe*

- Developed a full-stack e-commerce platform featuring user authentication, product catalog management, shopping cart workflows, and Stripe-based payment processing.

INTERNSHIP EXPERIENCE

Data Science Intern | EI Systems

2024

- Automated end-to-end data workflows via Python scripting, reducing manual intervention and improving pipeline efficiency through systematic debugging.

Backend Development Intern | Forage Virtual Program

2024

- Designed and deployed REST APIs with optimized database interactions for scalable performance; used Git for version control and contributed to code quality through self-review and testing.

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science & Systems Engineering — Andhra University | CGPA: 7.4 | 2021–2025

Certifications: Python (Coursera) · FastAPI (Udemy) · Java (NPTEL) · SQL (HackerRank)
